

SUSTAINABILITY POLICY

Silverstrand is committed to carrying projects and all business practices in a sustainable manner through operations and behaviors that seek to reduce and minimise our carbon emissions, energy, waste, water consumption and resource use.

To achieve these commitments, Silverstrand will undertake the following:

- Ensure that Senior Corporate and Project Management staff are committed to the implementation of the Sustainability Policy.
- Provide training to all employees on sustainability and best practice solutions;
- Comply with all environmental legislation, regulations and codes of practice;
- Operate an Environmental Management System certified to ISO 14001:2015;
- Seek environmentally and socially responsibility supply chain solutions;
- Use environmentally friendly materials and chemicals;
- Recycle and re-use all paper;
- Reduce office printing through use of electronic and cloud services;
- Recycle all used printer toner cartridges;
- Recycle and re-use all timber, nails, bolts and fixings on projects;
- Employ strategies to use our resources efficiently and eliminate or minimise any polluting activities to air, land and water;
- Minimise and control our waster through segregation and recycling where practical;
- Identify potential social and environmental impacts prior to the commencement of project through risk assessments;
- Create environmental and erosion and sediment control plans; and
- Exhibit leadership through continual improvement of our performance.

To ensure that Silverstrand is meeting these objectives, monthly reporting will be conducted for all business practices that will enable the measurement, recording and review of our sustainability performance.
